

Lithia Motors Environmental Policy

Lithia Motors recognizes that sustainable and responsible economic development is crucial to the future success of our Company and society. Through cooperation and creativity from employees at all levels, we commit to:

- Understand the environmental impacts of our facilities through measurement of our Greenhouse Gas (GHG) Emissions.
- Develop short-term and long-term strategies to reduce our environmental impact.
- Encourage solution sharing and best practices between our locations
- Educate the public about the benefits of eco-friendly vehicles.
- Expand our electric vehicle charging network.
- Expand sustainable business practices across locations including implementation of LED lighting, water bottle filling stations and recycling programs.
- Support facilities in applying energy efficient building and equipment standards.
